Section 5: Fire Fighting Measures

Flash Point (°F/ °C)	Flammable Limit (vol%)	Auto-ignition Temperature (vol%)
24°F / -4°C Estimated	No Data	No Data

WARNING: Highly Flammable. Keep away from heat, and any sources of ignition. Keep containers closed

/lethod:

Extinguishing Media: Use carbon dioxide, foam or dry chemical for small fires; Water or foam extinguishers, water fog for large fires

Fire Fighting Instructions: Remove all ignition sources. Wear self-contained breathing apparatus and complete personal protective equipment when entering

confined areas where potential for exposure to vapors or products of combustion exists.

Section 6: Accidental Release Measures

Personal Precautions: Use suitable protecting clothing/equipment eliminate all sources of ignition. No smoking

Methods of cleaning-up: Contain spillage with earth or sand

Mop-up small spills

Sweep up, use sand or earth to absorb spill for large spillages

Environmental precautions: Do not allow to enter water courses or drains

SDS: 2303201 Reactive Gloss Top Coat Dispose in accordance with local regulations

Local authorities should be advised if significant spillages cannot be contained

Section 7: Handling and Storage

Storage:

Handling: No smoking

Prevent static discharges

Exposure by inhalation or skin contact should be minimized by good industrial hygiene

Vapor is heavier than air, spreads along the ground.

Vapor can form an explosive mixture in air, prevalent in empty unclear vessels

Use non-sparking utensils when handling this material Keep containers tightly closed when not in use.

Store in a cool, dry place, away from sources of ignition, label containers

Eliminate possible point ignition sources, e.g. No smoking, Naked flames, static discharges

Use flame proof electrical equipment.

Section 8: Exposure Controls / Personal Protection

Engineering Controls When working with large quantities of product, provide adequate ventilation. Ensure that an eyewash station, sink or washbasin

is available in case of exposure to eyes.

Environmental Stability:

The components of this product will slowly degrade over time into a variety of organic compounds. Specific environmental data available for the components of this product are as follows

	Koc= 0.73. Water Solubility: 64,000 mg/l. Bioconcentration Factor= 4-14. Biocincentration is not anticipated to be significant. This compound can be removed from contaminated environments from volatilization, and biodegradation. This compound's half-life in water is 6.1 hours.
	Koc= 1.8. Water Solubility: 120 Parts H2O at 25°C (77°F). Bioconcentration Factor= 4-14. Biocincentration is not anticipated to be significant. This compound can be removed from contaminated environments from volatilization, and biodegradation. This compound's half-life in water is 6.1 hours.
	Low Kow= 0.05-0.14. Isopropyl alcohol occurs naturally; it is generated during microbial degradation pf plant and animal wastes. When released on land or water, it is apt to volatilize and biodegrade. The estimated half-life in water is 5.4 days, Isopropyl alcohol is not expected to bioconcentrate.
